

## Shanghai Foshion Medical Instrument Co.

Shanghai Foshion FJ8B

Shanghai Foshion Medical Instrument Co., Ltd was founded in 1999. With “self-cultivation, teamwork, performance and contribution to the society” as corporate culture, Foshion continues to shape its corporate image. Foshion has thus become one of the most famous brands in China in the past ten years.

Of a wide range of products, the Chair Mounted Dental Unit is Foshion’s main product. Foshion’s products also include the laboratory bench, sterilisation and cleaning equipment, imaging system equipment, hospital equipment and hospital administrative software are also within the scope of our business.

In the past ten years, Foshion has remained competitive by hiring professional managers, introducing international advanced technology, so as to adapt quickly to the economic globalisation, the operation of international trade as well as operation specialisation.

## Heraeus

Heraeus, the precious metals and technology group headquartered in Hanau, Germany, is a global, private company with over 155 years of tradition. Their businesses include precious metals, sensors, dental products and biomaterials, quartz glass, and specialty lighting sources. With product revenues approaching € 3 billion and precious metal trading revenues of € 13 billion, as well as nearly 13,000 employees in more than 110 companies worldwide, Heraeus holds a leading position in its global markets.

Heraeus Kulzer is a global supplier of dental and medical products headquartered in Hanau, Germany, with subsidiaries in the US, Europe, and Asia. With 20 affiliates around the world and more than 1,600 employees worldwide, in 2008 the company recorded sales of € 347 million. Being one of the world’s leading manufacturers of dental products, specialist for dental alloys and single-source provider of systems for the conservation and restoration of natural teeth, the Heraeus dental business division offers an extensive product portfolio for dentists and dental laboratories. Heraeus Medical is focused on research, development, manufacturing and marketing of bone cements and biomaterials for orthopaedics and tissue regeneration.

The new Heraeus GLUMA® 2Bond

### Products

The new **GLUMA® 2Bond** by Heraeus primes, bonds and desensitises in just one layer, and makes reliable bonding much easier. The new adhesive is suitable for direct and indirect restorations as well as for the treatment of hypersensitive areas of the teeth. Scientists worldwide have proven the excellent bond strength and marginal integrity of the new adhesive system.

The new fifth-generation adhesive GLUMA2Bond benefits from Heraeus’s long-term experience in developing safe and comfortable adhesives: Innovative chemistry with modern nanofillers provides excellent adhesion to enamel and dentine, as well as optimal marginal sealing. The proven glutaraldehyde agent “GLUMA Desensitiser” inside reduces post-operative sensitivity after the preparation or restoration of teeth.

## Shofu Inc.

Shofu Inc. was established on 15th May 1922 in Kyoto as a manufacturer of quality porcelain teeth. With 88 years of growth and experience in advanced manufacturing technology, Shofu has become one of the world’s leading manufacturer deeply involved in the field of dentistry with a wide range of dental materials, equipment and instruments.

Over the years Shofu Inc. expanded to an international enterprise with subsidiaries in the USA, Germany, UK, Singapore and China. In November 1989 Shofu Inc. was the first dental company to be listed on the Osaka stock exchange and recently on the Tokyo stock exchange in Japan.

Shofu Inc., Singapore was established in the 1980’s to serve the Asia-Pacific region with a main objective to support dentists and dental technicians while providing the best possible service to meet their demands and requirements.

Shofu has recognised the recent development of new clinical techniques in Minimally Invasive Cosmetic Dentistry (MiCD) procedures and is fully committed to support this movement by providing dental professionals with new biocompatible aesthetic product developments such as Giomer restoratives and Ceramage Indirect Composite for use in cosmetic dentistry.

Shofu's BeautiBond

### Product

#### BeautiBond

BeautiBond is an innovative All-In-One 7th generation bonding system designed to ensure a reliable, long lasting bond between light cured direct restorative materials and natural enamel or dentin efficiently. The HEMA free formulation and incorporation of two unique adhesive monomers guarantees a strong durable bond with a very thin bonding layer of 5µm that facilitates easy application of the restorative material. BeautiBond helps to save time, eliminate sensitivity and achieve predictable bonding with total peace of mind.
