

Koelnmesse Pte Ltd contributes to the NUS Faculty of Dentistry's 80th Anniversary Bursary Fund

Koelnmesse Pte Ltd, organiser of IDEM Singapore, contributes to the National University of Singapore (NUS) Faculty of Dentistry's 80th Anniversary Bursary Fund. This marks the start of its philanthropy programme in the region to support the dental education of deserving students. Koelnmesse also remains committed to support FDI's initiatives to promote oral health awareness.

In support of education and to ensure that deserving dentistry undergraduates are given equal opportunities, Koelnmesse Pte Ltd will donate S\$20,000 towards the National University of Singapore (NUS) Faculty of Dentistry's 80th Anniversary Bursary Fund. Recipients of this bursary can expect to receive assistance ranging from a few hundred dollars to S\$1800. The donation, like all bursary funds, will be administered by a faculty. Recipients will be chosen annually by the faculty members.

"Through organising IDEM Singapore, Koelnmesse has always been a promoter of continuous education. We are honoured to

be able to support the young, talented and aspiring dentistry students with the financial assistance that they need to complete their studies, especially during this global economic uncertainty. Our donation of SGD20,000 to the Faculty of Dentistry 80th Anniversary Bursary Fund is a wonderful opportunity for us to give back to the local community. This is the first in a series of efforts that we will be making as part of IDEM Singapore's philanthropy programme. We wish to spread the message of hope and importance of education by contributing to the financial needs of young dentistry students in other neighbouring ASEAN countries and eventually to the Asia Pacific" says Mr. Michael Dreyer, Vice President, Asia Pacific of Koelnmesse Pte Ltd.

In addition, Koelnmesse Pte Ltd will also contribute to FDI's "Sponsor a Window" programme to support their continuous efforts in promoting oral health awareness and development for the less privileged communities. **DA**
