

Belmont's user-friendly SP-CLEO II

Belmont introduces the second generation of the internationally acclaimed SP-CLEO series. With its folding leg rest chair and ultra maneuverable doctor table and cuspidor, the SP-CLEO II was designed for an eclectic

mix of treatments and for installation even in the most spatially challenged locations with nary a compromise to usability, durability or functionality.

Belmont's new SP-Cleo II

BioSonic® S1 Piezo Ultrasonic Scaler

The BioSonic® S1 Piezo Ultrasonic Scaler effectively cleans teeth 34% faster than traditional hand scaling, for significant savings on cost. Less tooth structure loss and increased patient comfort for the patient, while the cavitation effects of the handpiece tip will accelerate the disruption of biofilm to actively remove unhealthy infection-causing bacteria. The BioSonic® S1 Piezo Ultrasonic Scaling Unit offers six free piezo tips for general scaling, as well as, periodontic and endodontic procedures. An extensive tip selection includes 24 different styles for daily dental needs, and for those special and unique situations and individual preferences.

The BioSonic® S1 Piezo Ultrasonic Scaler

Crosstex International adds new size to Sure-Check Sterilization Pouch line

Crosstex International adds 5.25 x 6.5 size to Sure-Check Sterilization Pouch line

Crosstex adds 5.25 x 6.5 size to Sure-Check Sterilization Pouch line - ideal for bur blocks and impression trays. Only Sure-Check sterilization pouches have internal and external "multi-parameter" indicators that clearly show if the three parameters for sterilisation have been met during processing, i.e.: required temperature for the proper amount of time and contact with saturated steam under pressure (as recommended by CDC infection control guidelines and ISO sterilization standards). Using Sure-Check pouches provides you with a more reliable indication that the required conditions for sterilisation have been met as compared to using the current internal single parameter pouches currently on the market. The use of Sure-Check pouches saves money and time - no need to purchase separate indicator strips and insert them into the pouches.
